By Gabriel H. Sanchez, December 11, 2017

### 4. I Fought the Law by Olivia Locher (Chronicle Books)

"I Fought the Law looks at some of the most absurd and totally pointless laws that still exist in the US. After narrowing down her research to the single most bizarre law in each of the 50 states, Locher purposefully broke the rule in front of the camera. The results are a colorful and humorous look at the changing legal landscape of United States over the past century."
